With a strong interest in safety and surveillance, I am eager to contribute to maintaining secure environments and ensuring the safety of personnel and property. I have gained knowledge in monitoring access points and the importance of conducting regular patrols to prevent unauthorized entry and respond promptly to incidents. Additionally, I have experience with fiber optic systems, which are critical in maintaining secure and efficient communication networks. Familiar with security systems, reporting tools, and fiber optic installations, I am committed to upholding safety protocols and client satisfaction. I strive for excellence in all aspects of safety, security roles, and technical network management.
